PROMO

Ultratrans Flex is a heat-applied digital transfer, for application to many fabrics including corporate, sport, leisure wear.

Tested for high stretch, resistant to chlorine and certified to Oeko-Tex Standard, Ultratrans Flex presents a perfect branding solution.

This modern transfer gives the opportunity for highly detailed images with an unlimited range of colours and effects including photographic, embroidered and metallic.

Resistant to domestic washing up to 60°C and supplied on a clear carrier for precise positioning and efficient one process application.
